

SYNTHETIC DEMO TASK - no assessment content

Only edit `src/score-summary.mjs`.

Implement `summarizeScores(scores)`.

`total` is the sum of all scores.

`average` is total divided by the number of scores.

`highest` is the maximum score.

For an empty array return total 0, average 0, and highest null.

Do not modify `requirements.pdf`, `tests`, or `package.json`.

Verify the result with `npm test`.
